## **Introduction**

Envirodata's WeatherMation software has been developed to download, display and respond to the weather data from your weather stations, automatically.

The WeatherMation LIVE Service hosts this weather data on a secure web portal – with a dedicated mobile friendly format when connected by device.

Users can simplify their mobile access to their systems by adding an icon to their home screen to act as a shortcut to WeatherMation.

Further time saving can be achieved by saving your password in your browser, or requesting WeatherMation LIVE to 'remember me' when logging in.
