WeatherMation LIVE WMA_051_Mobile_Shortcut_V2_3 Public Users Safari.docx

Introduction

Environdata's Weather Mation software has been developed to download, display and respond to the weather data from your weather stations, automatically.

The Weather Mation LIVE Service hosts this weather data on a secure web portal – with a dedicated mobile friendly format when connected by device.

Users can simplify their mobile access to their systems by adding an icon to their home screen to act as a shortcut to WeatherMation.

Further time saving can be achieved by saving your password in your browser, or requesting WeatherMation LIVE to 'remember me' when logging in.
