2. Creating a shortcut on an Android device	6

Introduction

Envirodata's WeatherMation software has been developed to download, display and respond to the weather data from your weather stations, automatically.

The WeatherMation LIVE Service hosts this weather data on a secure web portal – with a dedicated mobile friendly format when connected by device.

Users can simplify their mobile access to their systems by adding an icon to their home screen to act as a shortcut to WeatherMation.

Further time saving can be achieved by saving your password in your browser, or requesting WeatherMation LIVE to 'remember me' when logging in.

1. Creating a shortcut on an iPhone or iPad using Safari Browser:

1. Open Safari and type- <https://www.weathermation.net.au/WMLogin.aspx> in the address bar.
2. Press enter to bring up the Login Screen:

3. Click on this image on the bottom middle of the screen:

4. Swipe to the left on the grey icon options bar until you see the “Add to Home screen” option on the menu:

5. Edit the name of the shortcut if you wish, then
6. Click ADD on the top right corner of your screen

7. The Shortcut is now setup – What Next?

- There will now be a shortcut on your mobile device. When you click the shortcut, it will take you to the WeatherMation LIVE Login Screen.
- For even easier access, you can enter your user name and password and click the Remember Me checkbox before pressing the Login Button.
 - Once you have selected 'remember me', every time you go to Weathermation LIVE from this device you will automatically be logged in as this user.
- On logging in you will be directed automatically to your Default WeatherMation screen:
 - Unless it is changed in your User Setup profile, this default screen will be the current readings screen for most users.
 - Alternatively you can choose to view the dashboards, reports or historic data as your default screen if you prefer.
 - Refer to the User Manual to assist you with the user options, including how to change your Default screen.
 - Default screens are set per user, and you can choose a default screen for mobile device and a default screen for desktop.

2. Creating a shortcut on an Android device

1. Open Google Chrome and type- <https://www.weathermation.net.au/WMLogin.aspx> in the address bar.
2. Press enter to bring up the Login Screen:

2. Click on the 3 dots in the top right-hand corner:

3. Select Add to Home screen from the menu

4. Edit the name of the shortcut if you wish, then
5. Click ADD on the bottom right of the pop up box:

6. Click ADD again

7. The Shortcut is now setup – What Next?

- There will now be a shortcut on your mobile device. When you click the shortcut, it will take you to the WeatherMation LIVE Login Screen.
- For even easier access, you can enter your user name and password and click the Remember Me checkbox before pressing the Login Button.
 - Once you have selected 'remember me', every time you go to Weathermation LIVE from this device you will automatically be logged in as this user.
- On logging in you will be directed automatically to your Default WeatherMation screen:
 - Unless it is changed in your User Setup profile, this default screen will be the current readings screen for most users.
 - Alternatively you can choose to view the dashboards, reports or historic data as your default screen if you prefer.
 - Refer to the User Manual to assist you with the user options, including how to change your Default screen.
 - Default screens are set per user, and you can choose a default screen for mobile device and a default screen for desktop.
